

Disclaimer

Please read this Disclaimer carefully before using **AntiScam Monitor**, available at <https://antiscamonitor.com/> and <app.antiscamonitor.com> (the "Service"). By using the Service, you acknowledge and agree to the terms below.

1. Not Our Opinion — Data-Driven, Automated Scoring

AntiScam Monitor does not form or express personal opinions, beliefs, or judgments about any token, project, or team. **Every Trust Score, Monitor Grade, Risk Level, flag, and metric displayed on the Platform is generated automatically**, through a fixed, published methodology that analyzes:

- Publicly available blockchain ("on-chain") data such as smart contract code, token holder distribution, liquidity, and transaction activity; and
- Where applicable, information voluntarily submitted by project teams (such as allocation breakdowns, wallet addresses, and vesting schedules), which may be reviewed but is not independently verified in every case.

We do not manually rate, endorse, recommend, or condemn any project. A score reflects what our systems observed at a given point in time, based on the data available to them, nothing more.

2. Not Financial or Investment Advice

Nothing on the Platform constitutes financial, investment, legal, tax, or other professional advice. AntiScam Monitor does not recommend that you buy, sell, hold, or otherwise transact in any token or asset. Any decision to invest in or interact with a token is made solely at your own discretion and risk. You should always conduct your own independent research ("DYOR") and, where appropriate, consult a qualified financial or legal professional before making any investment decision.

3. No Guarantee of Accuracy or Completeness

Blockchain data can be incomplete, delayed, or subject to interpretation, and information submitted by project teams may be inaccurate, outdated, or misleading despite our review processes. As a result:

- Scores, flags, and metrics may not reflect the current or complete state of a token at any given moment;
- A high Trust Score, Monitor Grade, or "verified" status is **not a guarantee** that a project is safe, legitimate, or free from risk;
- A low score or the presence of flags does not necessarily mean a project is fraudulent, it reflects the specific factors our methodology evaluates, which may not capture every relevant consideration.

We make no warranty, express or implied, as to the accuracy, completeness, reliability, or timeliness of any information displayed on the Platform.

4. Beta Status and Evolving Methodology

AntiScam Monitor and its underlying scoring methodology may be in active development, including during beta phases. Scoring criteria, weightings, categories, and available data sources may change over time as we refine our systems. Historical scores may not be directly comparable to current scores following such changes.

5. No Guarantee Against Loss

Cryptocurrency markets are inherently volatile and risky. Even tokens with favorable scores on AntiScam Monitor can lose value, be subject to exploits, or otherwise result in financial loss. We are not responsible for any financial loss, damage, or harm resulting from your reliance on information provided by the Service, or from your participation in any token, project, or transaction referenced on the Platform.

6. Third-Party and User-Submitted Content

The Platform may display information submitted by third parties, including project teams and users (e.g., via bug reports or project claims). We do not adopt such content as our own statement or opinion, and we disclaim responsibility for its accuracy. Where a listing is marked "Team Verified," this indicates that a project team has claimed and submitted information for that listing, it does not constitute our independent confirmation of every detail submitted.

7. Your Responsibility

By using the Service, you acknowledge that:

- You are solely responsible for evaluating the merits and risks of any token, project, or transaction;
 - You will not rely solely on AntiScam Monitor as the basis for any financial decision;
 - You understand the inherent risks of cryptocurrency investment, including the potential for total loss.
-
